Become a junior member of our Product Management team and get the chance to learn from experienced teammates and gradually take responsibility for leading your own product or product line. ComAp products are solutions for a variety of applications such as standby or prime power generation, combined heat and power generation, and many others.

This position is suitable for fresh graduates who want to apply their theoretical technical knowledge in practice in combination with commercial aspects and are interested in starting their career path in the Product Management area.

You will work closely with colleagues from ComAp headquarters and subsidiaries as well as with our distributors and customers to create a specification for your products matching customers’ needs, develop the products throughout their lifecycle, define related business models and promote the product solution to ensure its’ success. Competition benchmarking and orientation in current technology trends with a focus on electronically controlled engines will be essential for your work. Don’t worry, at the beginning, we will teach you how to do it.

**It’s a great opportunity for you if you:**

- Finished a university in a technical field and would like to combine theoretical background with real practice
- Are keen to acquire experience in Product management and focus on the technical as well as business aspects of the product
- Consider yourself as a great communicator with a strong analytical mind
- Are tempted to use English on a daily basis
- Also show passion, drive and result orientation in complex tasks
- Have the ability to work independently and also to liaise with colleagues across the whole company
- Are interested in short travels (exhibitions, conferences, customers, suppliers)

**You can look forward to:**

- Environment of an international company that successfully sells its products to more than 100 countries around the world
- A creative job and space for self-fulfilment and work on various exciting projects
- Friendly atmosphere and colleagues who will be always there to support you
- Work at our headquarters in Prague - Holešovice in our new and modern premises, combined with home offices

If you think that this is what you were looking for, send us your CV and contact details, and let’s take this conversation to the next level. Lucie Přídalková, who is responsible for this position, will contact you soon with further details.
