Working for NATUS

As a family-run business with more than 500 employees, we combine traditional values such as respect and mutual trust with the innovative abilities of a future-orientated technology company. Thinking and acting for the long term comes naturally to us. Together with our customers, staff, suppliers and partners, we strive for successful collaboration. The framework conditions in the workplace are designed so that staff feel good, from a human as well as a professional perspective.

We are looking for one as soon as possible

Project Manager Medium Voltage Switchgears (m/f/d)

Your tasks:

- Technical handling of switchgear projects in the medium-voltage field
- Planning and coordination of projects in cooperation with the project managers
- Overall project responsibility
- Communication with the customer and coordination with our sales department
- Deadline monitoring and project management
- Follow-up management

Your profile:

- Completed studies in the field of electrical engineering or energy technology
- Good communication skills and secure contact with business partners
- Organizational talent
- Well-developed commercial and technical understanding
- Confident grasp of standard Microsoft Office applications
- Very strong written and verbal skills in German / English
- Commitment and team spirit as well as an independent and conscientious working approach

Become part of our team!

We are looking forward to your application.
