Software developer in C++ and MPS (f/m/d)

Location: Prague
Are you now looking for a challenge that suits your abilities? Do you want to take on demanding tasks as part of an experienced team? Then you are in the right place with Porsche Engineering.

We are a growing team focusing on software development in the automotive area. During our pursuit of excellent code we rely on the Agile manifesto while respecting the ASPICE framework. Our motto is "We create Software right!". To continue delivering high quality software, we seek a developer/architect who would strengthen our team not just in coding itself, but also in clean class design and architecture.

What will you be dealing with?
You would be looking for solution of complex and non-trivial tasks using your knowledge and experience, learning new technologies, finding new ways through the vast universe of software development. You will cooperate on the solution with colleagues from Prague, Ostrava, Germany and other locations around the world.

What experience and expertise are the best fit for the position?
- Relevant university education (IT, Automotive, Control Engineering)
- Very good Object Oriented Design
- C++, Jetbrains MPS, Domain specific languages
- Agile methodologies such as Scrum
- Good spoken and written English, German is an advantage
- Enthusiasm about modern technologies and cars
- Willingness to travel

Nice to have:
- Experience with Linux
- IT Security, Cryptography and Trusted environment
- Programming/scripting languages such as C#, Java, Bash, Python
